

PRECISION WELDING OF INTRICATE COMPONENTS

Welding of small components with critical tolerances is enhanced with precision welding equipment. Improved product quality and reduced scrap rates for surgical instruments, tube end closures, guide wires and similar critical components are achieved with greater manufacturing control offered by the Plasma Welding process. Affordable turnkey welding systems can be provided with a welding power supply, weld control, fixture and tooling. Weld development assistance, weld training, sample welding and service training can be provided. For further information call or write: Process Welding Systems, Inc., 72 Buchanan St., LaVergne, TN 37167. Phone 615-793-7020, Fax 615-793-7557, e-mail: proweld1@gte.net, website: pws weld.com .
